

THE NEW STANDARD IN ENZYME PRODUCTION

Regulatory compliance and highest quality at paradigm shifting prices

Partner with Enzymatics as your OEM supplier and gain a competitive advantage with superior quality products at exceptional prices.

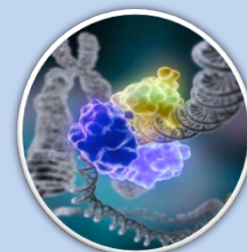

Superior Enzyme OEM Solutions

Enzymatics' Manufacturing Team has decades of combined experience in enzyme design and production. The company has a proven track record of successes with business-to-business solutions for life science reagent and molecular diagnostics companies. Made to order products, standard-setting quality systems, technical expertise, and dedicated OEM customer service enable us to provide the highest quality enzymes for your products and services.

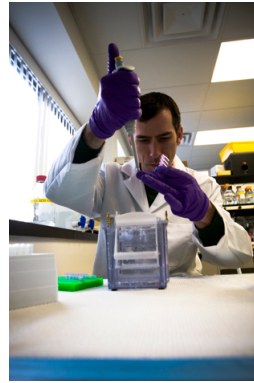

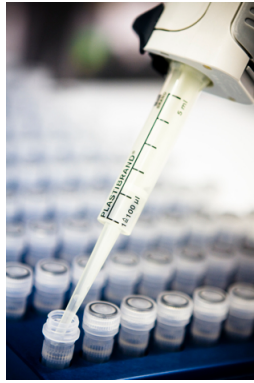

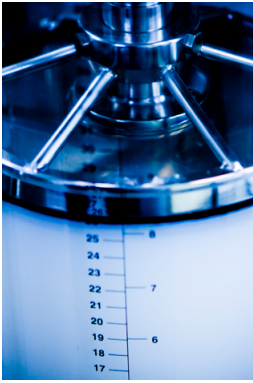

Products Manufactured Under the Highest-Quality Standards for Molecular Diagnostic Assays

Enzymatics' process sets a **New Standard in Enzyme Production**. Our propriety production technology ensures that you receive enzymes that exceed the quality of similar products produced by other suppliers. We have a growing and global list of satisfied partners in the fields of molecular diagnostics, life science research reagents and biotechnology that have already benefited from our high standards and quality as well as our lower prices. Our OEM partners' competitive advantage is enhanced by our commitment to supreme quality at paradigm shifting prices.

Advantages of Enzymatics OEM Services

- Performance enhancing quality at extraordinarily cost-effective prices
- ISO 13485, cGMP compliant production
- Enzymes in bulk or custom sizes
- Development of special enzyme formulations and mixtures
- Manufacturing and packaging of custom products and kits
- Unmatched lot-to lot consistency
- Flexible, dedicated and responsive technical support teams

Our Quality Management System Fulfills all the Requirements for IVD Assays and Kits

Our ISO 13485 Quality Management System Ensures:

- cGMP-compliant according to 21 CFR 820
- Validated, proprietary production process
- Comprehensive documentation of all steps in R&D and production
- Validated filling and packing equipment
- Highly trained, expert staff
- Lot sequestering
- Redundant storage

We welcome our partners to audit our manufacturing facilities!

A Secure Supply Chain

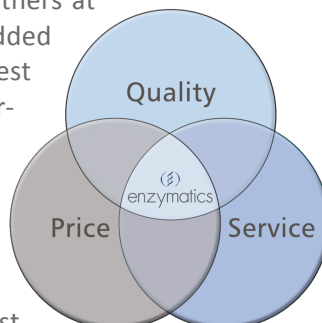

Partnering with Enzymatics guarantees lot-to-lot consistency, pre-qualified by extensive verification and validation, and uninterrupted supply of your enzyme to secure your business continuity. We can quickly adjust production volume as needed so that even in the event of high product demand, you are assured of the flexibility you need and security in your product manufacturing processes.

Our Services Include:

- Custom function/QC assay development and QC testing
- Cloning and protein expression
- Purification and process development
- Custom concentrations

Technology/Process Development and Custom Manufacturing

At Enzymatics we work closely with our partners at the R&D and production levels to provide added customized solutions backed by the best possible support and service. Customer-driven projects begin with a thorough needs analysis by our business development team. This assessment produces the inputs required to generate a comprehensive statement of work to be performed with a clear timeline and cost structure. Senior-level scientists guide each project from initiation through completion.
